PROFILE

As a software developer with a passion for the Salesforce ecosystem, I am skilled in developing custom applications and integrations within the Salesforce platform. I specialize in designing and implementing solutions that meet the unique needs of businesses. I am strongly committed to delivering high-quality work and excel in collaborative environments that foster creativity and innovation. With my passion for software development and expertise in Salesforce, I am eager to explore the exciting possibilities that lie ahead in the rapidly evolving world of technology.

WORK EXPERIENCE

City Bus Driver

MPK S.A. w Krakowie

10.2022–Present

- Operate city bus routes, ensuring the safe transportation of passengers.
- Conduct regular inspections and maintain the bus in good condition to ensure optimal performance and passenger safety.
- Communicate effectively with passengers, providing clear instructions and assistance, and handle various situations with professionalism and empathy.
- Collaborate with other drivers and dispatchers to ensure the efficient and reliable delivery of service, coordinating schedules and responding to any changes or disruptions.

Salesforce Developer | Administrator

Independent contractor

01.2022–Present

- Create and manage custom Lightning components and Lightning Web Components (LWCs).
- Develop and maintain user interfaces using Salesforce Lightning Design System (SLDS), HTML, CSS, and JavaScript.
- Maintain and enhance existing Salesforce applications to improve usability, performance, and functionality.
- Develop responsive and mobile-friendly websites using HTML, CSS, and JavaScript, and implement designs using popular frameworks such as Bootstrap, Tailwind, or Material UI.
- Implement user interfaces using React and integrate them with backend APIs to create seamless user experiences.
- Collaborate with clients to understand their business requirements and translate them into technical specifications, while providing regular progress updates and feedback.
- Utilize version control tools such as Git to manage code changes and adhere to established coding standards and best practices to ensure code quality and maintainability.
- Create and implement triggers to automate processes and perform actions based on specific events or conditions within the Salesforce environment.

Technical Sales Consultant

Edison Energia | Leste

02.2021–10.2022

- Delivered informative and persuasive presentations to customers, highlighting the key benefits and advantages of our products and services.
- Maintained up-to-date knowledge of industry trends and technologies, ensuring that our customers received the most current and relevant advice.
- Contributed to the growth and success of the company by successfully closing deals, meeting or exceeding my sales targets, and providing valuable technical insights and expertise to our customers.
- Developed and executed social media marketing strategies to help our customers increase brand awareness, drive traffic to their websites, and generate leads.

SALESFORCE PROJECTS

Salesforce Administrator | Developer

Salesforce Administration | Light Web Components | Apex

03.2023–05.2023

- Configured and customized Salesforce based on business requirements, creating custom objects, fields, validation rules, workflows, and page layouts. Implemented changes to enhance user productivity and efficiency.
- Data Management: Handled data import, export, and maintenance within Salesforce, ensuring data integrity. Regularly cleaned and updated data for accurate reporting and analysis.
- Monitored and maintained the Salesforce system, performing routine maintenance tasks and managing user roles, profiles, security.
- Developed custom solutions on the Salesforce platform using Apex, Lightning Web Components, and other Salesforce technologies.
- Collaborated with the integration team to integrate Salesforce with other systems and external APIs.
- Ensured data accuracy, integrity, and security within Salesforce, including data migration, transformation, and validation.
- Identified and resolved technical issues, bugs, and errors within Salesforce applications.
- Stayed up to date with Salesforce updates, best practices, and industry trends to propose and implement system improvements.

Salesforce Administrator

Salesforce Administration

1.2023–02.2023

- Configured and customized Salesforce to meet specific business requirements, including creating custom objects, fields, validation rules, workflows, and page layouts. Enhanced user productivity and efficiency through implemented changes.
- Managed data import, export, and maintenance within Salesforce, ensuring data integrity and accuracy. Regularly cleaned and updated data for reliable reporting and analysis.
- Provided comprehensive user support and promptly addressed queries and issues.
- Monitored and maintained the Salesforce system, performing routine maintenance tasks and managing user roles, profiles, security settings, and backups. Ensured smooth transitions during system upgrades.
- Identified and resolved Salesforce-related issues such as system errors, user access problems, and data inconsistencies. Collaborated with Salesforce support and escalated critical issues for timely resolution.

PERSONAL PROJECTS

Goffer - Social App

Software Developer

JavaScript | React.js | Node.js | MongoDB | JWT | Redux Toolkit | Express | API | HTML | CSS

In Development

- User Authentication: Users can create an account or log in using their credentials, ensuring secure access to the app's features and personalized experiences.
- User Profile Management: Users have the ability to create and manage their profiles, including adding a profile picture, updating personal information, and tracking their sports-related activities and achievements.
- Place Creation: Users can create their own places, such as sports arenas, fields, or gyms, and provide details about the facilities, location, and available amenities. This feature allows other users to discover and join events hosted at these places.
- Meeting Rooms: Users can join meeting rooms where they can connect with other participants, discuss upcoming events, and plan strategies. This collaborative feature fosters a sense of community among users and enhances the overall experience of the app.
- User and Place Search: The app provides search functionality, enabling users to find specific users or places based on their preferences, location, or sports interests. This feature facilitates the discovery of like-minded individuals, suitable sports venues, and upcoming events.

Heat Pumps Comparison App | GITHUB

Software Developer

JavaScript | Next.js | MongoDB | API | HTML | CSS

In Development

- The app is a web application built with Next.js, designed to assist users in comparing various heating pumps.
- Users can conveniently compare the technical specifications, energy efficiency ratings, and prices of different heating pumps.
- The app offers a comprehensive comparison feature, allowing users to evaluate the pros and cons of each heating pump side by side.
- Detailed technical specifications for each heating pump are provided, enabling users to make informed decisions based on their specific requirements.
- Energy efficiency ratings are included for each heating pump, allowing users to prioritize environmentally friendly and cost-effective options.
- The app also provides a price comparison feature, enabling users to identify the most affordable heating pump options within their desired specifications.

Dom z Pompa Website | GITHUB

Software Developer

JavaScript | HTML | CSS | PHP

04.2022 - 10.2022

- Home Page: The website features a comprehensive home page that provides an overview of the HVAC company's services and offerings. Users can quickly grasp the company's expertise and areas of specialization.
- Services Page: A dedicated services page offers detailed information about the specific HVAC services provided by the company. Users can explore the range of services offered, such as heating system installation, air conditioning maintenance, ventilation solutions, and more.
- Contact Page: The website includes a contact page with a user-friendly form that allows visitors to easily get in touch with the company. Users can submit inquiries, requests for quotes, or schedule appointments directly through the contact form.
- Responsive Design: The website has been developed with a responsive design approach, ensuring that it adapts and optimizes its layout for seamless viewing and usability across various devices. Users can acce
